B. E. P. Q.-405, Supplement No. 2 March 3, 1937

PLANT-QUARANTINE IMPORT RESTRICTIONS

OF THE

REPUBLIC OF GERMANY

Entry of Single Christmas Trees Authorized

According to a notification of the Minister of Nourishment and Agriculture (R. Z. Bl. No. 88, October 21, 1936, p. 362), the provisions of the decree of June 3, 1930 (see pages 11 and 12 of B.E.P.Q.-405, Importation of Coniferous Plants Restricted) are not applicable to the importation of single Christmas trees without balls of earth or to branches of conifers, insofar as those products are intended as gifts or accompany shipments intended as gifts and not for industrial purposes.

The decree of October 26, 1936, revokes and supersedes that of February 28, 1929, on the prohibition of the importation of pine and spruce seeds, as amended by that of September 13, 1929.

Consequently, the two paragraphs on page 13 of B.E.P.Q.-405 under the caption "Importation of Pine and Spruce Seeds Prohibited" are to be stricken out and replaced by the following:

Importation of Seeds of Coniferous Trees Prohibited

(Decree of October 26, 1936)

Article 1. The importation of seeds and seed-bearing cones of coniferous trees indigenous to Germany, with the exception of those of Swiss stone pine (Pinus cembra L.), is prohibited.

Art. 2. The through transit of the above-named products is permitted under customs supervision.

Cut Flowers of Carnations

The Ministerial decree of September 21, 1936 (R.G.Bl. I, p. 83) modifies previous regulations on the importation of cut flowers of carnations by prohibiting their importation into Germany from March 15 to November 15, instead of from March 15 to November 30, as hitherto. The date should be changed accordingly in the corresponding item in the summary on page 2 and in the text on page 13 of Circular B. E. P. Q.-405.

The heading of the item of the summary on page 2 of B.E.P.Q.-405, "SEEDS OF SCOTCH PINE (Pinus sylvestris L.), and NORWAY SPRUCE (Picea excelsa Link.)" is to be replaced by the heading "SEEDS AND SEED-BEARING CONES OF CONIFERS INDIGENOUS TO GERMANY, except those of Pinus cembra L."
